JUSTIFICATION:

Due to the extensive utilization of the Firehawk helicopter for EMS transports, swift water/flood rescues, fire activities, and the implementation of the new 3rd Air Squad; the 500-hour maintenance inspection and service will be required sooner than expected.

In order to have the helicopter available at the earliest possible time during this fire season, we are requesting Sikorsky to provide the necessary personnel to perform the inspection and service at the District's Barton Heliport facility.

Sikorsky Aircraft Corporation is the original equipment manufacturer and the 500-hour inspection and service is a mandatory component of the helicopter maintenance regime established by the manufacturer.

Implementation of Strategic Plan Goals

Approval of the recommended action is consistent with the County's Strategic Plan Goal #1, Service Excellence.

FISCAL IMPACT/FINANCING:

It is the intent of the Air Operations Section to utilize our helicopter maintenance personnel to assist Sikorsky with the 500-hour inspection, thus reducing the costs. The estimated cost of the 500-hour inspection and service will not exceed the \$155,000 funding for this purchase order and is available in the District's 2005-06 Service and Supplies Budget for the North Regional Operations Bureau, Air and Wildland Division, Air Operations Section. There is no impact on net County cost.

FACTS AND PROVISIONAL/LEGAL PROVISIONS:

The County Purchasing Agent has a statutory limitation of \$100,000 for Sundry Service; therefore, your Board's approval is necessary to accomplish this critical maintenance requirement.

The District is in the process of developing a formal contract proposal with Sikorsky Aircraft Corporation for future 500-hour maintenance inspection and service. We are currently in the process of finalizing the terms and conditions of the contract.

1.1. Corporation

Sikorsky Support Services, Inc. (known as “SSSI”) is a wholly owned subsidiary of Sikorsky Aircraft Corporation (“SAC”). We are dedicated to providing high quality management, technical and operational services for worldwide customers. Our core competencies include repairs, maintenance and modifications to both rotary and fixed-wing aircraft. An element of ACE is the use of formal problem solving tools. These tools are used to quickly and efficiently resolve “molehills” before they become mountains.

In summary, SSSI's development of formal problem solving tools and efficient processes has resulted in keeping our costs low and creating less risk to us and the customer.

4.0 Summary

SSSI is on-the job currently supporting every agency of the U.S. Government.

SSSI receives continuous compliments on the service performed at our Field Operations Centers. In relation to Armed Helo kit installations, DCMA at Sikorsky recently commented:

My final impressions of the work coming out of FOC Jacksonville, FL is this organization performs and completes some outstanding work and modifications, and I found the personnel were very knowledgeable in all areas of operations. It was a pleasure to work with such professionals.

Our men in the field are also dedicated to supporting the customer. A recent U.S. Marine Corps article praised the SSSI team for keeping the CH-53E Super Stallions galloping in Iraq. The article read, "They don't wear camouflage uniforms or high and tight haircuts, but they go through the same situations service members here go through and maintain their loyalty to the Corps by helping the [Marines] get the job done in support of Operation Iraqi Freedom and the Global War on Terrorism."

This is the type of service that SSSI provides.
